

## Pawport Partners with Kolbe to Seamlessly Integrate Smart Pet Doors into Glass Windows and Doors

**PHOENIX - (Feb 25, 2025) - [Pawport](#)**, a Phoenix-based consumer tech startup, announces its partnership with [Kolbe Windows & Doors](#), expanding installation possibilities for the award-winning Pawport Smart Pet Door. Homeowners will be able to purchase a wooden or glass door or floor-to-ceiling window from Kolbe with a Pawport Smart Pet Door already installed, providing sleek, highly secure options for homeowners looking to add convenience and functionality while enhancing the aesthetics of their home.

“By seamlessly integrating Pawport into Kolbe’s premium doors and windows, we’re offering homeowners a new level of flexibility and customization regarding their Pawport installation,” said Martin Diamond, CEO and founder of Pawport. “This collaboration allows us to reach customers at the highest level of detail and aesthetics and deliver a truly unique solution for their pets.”

### **Smart. Secure. Seamless.**

Pawport is a patented, smart, secure pet door that retrofits onto existing pet doors in seconds, instantly converting old fashioned, flimsy, unsightly, and vulnerable pet doors into high-security doors that can be controlled via an app and integrated into a smart home. Pawport connects via

WiFi to the Pawport app, enabling remote control and management, curfew and other scheduling functionality, voice control via Alexa, Siri, or Google, and pet-specific tracking and usage data. Pets utilize the door by virtue of a small, lightweight, waterproof Bluetooth collar tag that verifies the pet and opens Pawport when the pet is near.

### **Engineered for Protection & Durability**

Pawport's partnership with Kolbe offers a customizable door or window solution tailored to any home. Pre-installed offerings include the Pawport Smart Pet Door, available in 13 finishes, and the optional weatherproof Outdoor Pet Door, enabling a dual-door operation that works in sync for superior insulation and security. Constructed of high-grade steel and aircraft-grade aluminum and finished with a durable powder coat, the Pawport Outdoor Pet Door is built to withstand harsh conditions and climates while maintaining a refined, modern look.

"We're thrilled to partner with Pawport to bring this innovative solution to our customers," said Jeff DeLonay, president of Kolbe Windows & Doors. "The Ultimate System is the perfect combination of security, convenience and design for pet-loving homeowners."

Integrated Pawport / Kolbe product will be available this summer. Visit [pawport.com](http://pawport.com) or <https://www.kolbewindows.com> to learn more about current offerings. Hi-res imagery is available [here](#).
